LAWN REPAIR MIX
MEZCLA PARA REPARAR EL CESPED

SUN + SHADE MIX

PatchMaster® Lawn Repair Mix makes it easy to repair bare spots in your lawn. Everything you need to seed is pre-mixed and ready to grow:

Grass Seed
Mixture of premium perennial ryegrasses, fine fescues, and Kentucky bluegrass selected to blend with your existing lawn and adapt to sunny or shady conditions.

100% Recycled Mulch
Recycled pelletized paper mulch is biodegradable and helps keep the seed moist and in place during establishment.

Feeds Up To 6 Weeks
Controlled release nitrogen that seedlings need for fast growth and thick results.

HOW TO APPLY CÓMO APLICAR

1 PREP

Remove dead grass if necessary and loosen the top 2 inches of soil.
Si es necesario, retire el césped muerto y afloje los primeros 5 cm de tierra.

2 APPLY

First, shake the bag to mix the contents. Then, evenly spread a thin layer of PatchMaster® Lawn Repair Mix to completely saturate and no more water is being absorbed (this may take several minutes). Avoid puddling water or rain. Continue to water daily or more as needed to keep the soil moist.

3 WATER

A deep and thorough initial watering is the key to success. Gently water the area until PatchMaster® Lawn Repair Mix is completely saturated and no more water is being absorbed (this may take several minutes). Avoid puddling water or rain. Continue to water daily or more as needed to keep the soil moist.

Un recipiente separado y homogéneo a nivel de acción. Reparta una capa delgada hasta que el PatchMaster® sea completamente saturado y ya no absorba más agua (esto puede tomar varios minutos). Evite que se acumule el agua. Continúe regando a diario o más, según sea necesario, para mantener húmedo el suelo.

HELPFUL TIPS

- Fall and Spring are the best times to use PatchMaster® Lawn Repair Mix. Seed germination best when daytime temperatures are between 60°F and 80°F.
- Keep kids, pets, foot traffic, and lawn mowers off of the new seedlings until they are 3 inches in height!
- Mow new seedlings as soon as they reach normal mowing height, about 3 inches.

- Do not apply weed control products until the grass is well established (mowed at least 4 times). Additionally, if you recently used a weed control product, refer to those product instructions to determine how soon you can plant grass seed.
- Once established, after 8 to 8 weeks, continue to fertilize regularly using Scott's® Turf Builder® for a thicker, greener turf.

Scott's No-Quibble Money Back Guarantee™
If for any reason you, the consumer, are not satisfied after using this product, you are entitled to get your money back. Simply send us original evidence of purchase and we will mail you a refund check promptly.

NOTICE: ARBITRATION/CONCILIATION MEDIATION REQUIRED BY SEVERAL STATES.

Under the seed laws of several states, an arbitration, mediation or conciliation is required as a prerequisite to bringing a legal action based upon the label or seed to which this notice is attached to produce as represented. The consumer shall file a complaint with the mediator (find the mediator's name with the Commission Director Secretary of Agriculture, Seed Commission or State Agriculture Office) within such time as is herein indicated or the crops, plants or trees by the designated agency and the government form when the seed was purchased. A copy of the complaint and its terms to the extent by certified or registered mail or as otherwise provided by state statute.

CAUTION: Keep Out of Reach of Children

Eye contact with contents may cause eye irritation. Flush eyes with water as soon as possible. Avoid contact with clothing and wash hands with soap and water after handling.

PRECAUCIÓN: Mantener fuera del alcance de los niños

El contacto de contenidos con los ojos puede ocasionar irritación ocular. Enjuague los ojos con agua lo antes posible. Evite el contacto con la ropa y lávese bien las manos con agua y jabón después de manipular el producto.
