SHARP BLADE VS. DULL BLADE

SHARP BLADE

- Clean cut
- Healthier-looking lawn
- Efficient mowing

DULL BLADE

- Ragged cut
- Brownish appearance
- Weaker lawn, prone to diseases and pests

DURABLE

Heat-treated to withstand impacts and extend life

Precisely balanced for less vibration on equipment and operator

SHARPER EDGE

- Longer cutting edge for improved cutting efficiency
- High-lift design for superior discharge and more efficient cutting

Get a Sharp Edge with Arnold High-Quality Blades

GET "GREEN" WITH ARNOLD FLEXIBLE OIL PACKAGING!

Featuring flexible packaging at your dealership is a decision you can feel good about! Not only is the unique design a key selling advantage, but so is its "green" footprint. This focus around sustainability will be sure to resonate with today's environmentally conscious consumers.

A "GREENER" PACKAGING SOLUTION:

- Generates less solid waste in landfills
- Requires less energy and natural resources to produce
- Generates less carbon emissions
- Requires less energy to transport due to its lightweight, flexible design

FLEXIBLE PACKAGING FACTS:

- 26 truckloads of unfilled rigid bottles equals 1 truckload of unfilled flexible pouches
- Flexible packaging consumes 50% less energy compared to the next closest alternative (aluminum can), and 85% less energy compared to a plastic bottle
- Flexible packaging represents the 2nd largest packaging segment in the U.S.

HOW TO MEASURE A TIRE

1. Measure the outside diameter of the tire.

2. Measure the wheel (or rim).

The wheel is either the steel or plastic.

3. Measure the hub length through the middle of the wheel

(or hub), measuring from end point to end point (or bearing to bearing).

4. Measure the bearing size. The bearing is the metal piece on the end of your hub where your axle goes through.

STRING TRIMMER LINE & ACCESSORIES

Helping your customers choose the right grade of string trimmer line is easy when you understand what each level of line offers.

Trimmer line is divided into three categories: Residential, Commercial and Professional. Below is a brief description of each category to help you match the product to your customer's needs.

Residential

- The perfect grade for the average consumer
- Nylon material is suitable for typical trimming jobs around the yard

Commercial

- For bigger jobs and more frequent use
- Cuts three times more area than Residential lines
- Edged (not round) line shape improves cutting performance
- Durability for trimming around decks and wooden fences

Professional

- Delivers the durability and performance the professional landscaper demands
- Cuts nine times more area than Residential lines
- Tough enough for edging and cutting through thick vegetation

ARNOLD UNIVERSAL PARTS ARE PACKAGED TO SELL!

Arnold's packaging is specifically designed with the consumer in mind. It provides quick-hit information to make the shopping experience easier, requiring little assistance from you.

Arnold's universal parts packaging features:

- User-friendly appearance
- Easy-to-find application information
- Helpful "how-to" instructions

The high visibility icon tab creates an immediate visual cue for the consumer, telling them the type of equipment and the brand the part is suited for and, when applicable, the original part number of the item it replaces.

The cross-selling bubble on the package alerts the consumer to additional products that are available from Arnold for more complete equipment maintenance.
